□ Portable XAMPP is a portable version of XAMPP. □ It is capable of auto-starting Apache, FileZilla FTP, Mercury Web Server, Tomcat, Mercury DB, and XAMPP MySQL. □ It also has the ability to stop the services, show program files, web statistics and more. □ Once installation is complete, it will launch a GUI-like program that can be used to edit the program and browse the available services. □ Uninstallation is also made easy with the

Portable XAMPP solution, although you must close the main application. □ It is currently available for Windows XP, Vista and Windows 7. □ Full system requirements are: □

XAMPP

1.6.x/1.7.x/1.8.x/2.0.x □

Portable XAMPP □ In addition, the program's required pre-requisites are: □ JRE 1.5 or 1.6 □

JVM 1.6 □ Ant 1.8 □ The

application comes in a 4

GB zip file. □ You can

download and use this

utility for free. □ Portable

XAMPP is compatible with

all versions of Windows

operating systems. □ You

can download this XAMPP solution from the following link: [□ □](#)

Portable XAMPP provides users with all of the great components of XAMPP, and makes them simple to use and uninstall. [□](#) It is well known for its features, and this is all the more important because the application itself is lightweight and easy to use. [□](#) You can download this utility for free. [□](#) Simply move the Portable XAMPP to a directory where it is convenient, or drop the XAMPP folder into the %appdata% directory and

launch the application  
from the start menu. □

After installation, Portable  
XAMPP creates an icon in  
the system tray area,  
where it is minimized on  
exit. □ This program is  
capable of auto-starting  
programs that come  
bundled with the XAMPP  
suite. □ Once X

## **What's New in the Portable XAMPP?**

Portable XAMPP is a lightweight utility that installs Apache HTTP Server, MySQL, FileZilla FTP Server, Mercury Web Server, and Tomcat web server, as well as PHP and Perl development tools. We decided to put them together for a fair and long lasting evaluation. TutorMart combines video and text-based lessons in one

package. The lessons can be subscribed for a monthly fee. There are numerous options on how to display the text-based lessons including videos, images, flow charts, graphs, drawings, and MP3 files. They can be downloaded onto any Mac or PC and this means that they can be used anywhere in the house as there are no complicated installation issues. The interface is simple and looks a lot like a website. You can search for the lessons you want, watch as many as you like, print a collection for reference,

or take notes. You can also view completed courses, get lesson tips and view a synopsis of each topic. The lessons can also be downloaded in the MP3 format onto your iPod, iPhone or other mp3-enabled devices. When you are finished with each course, you can either listen to the lessons on your iPod or exit the program. The interface is extremely simple and you can enjoy the lessons for a long time. Adobe Reader allows you to view PDF files without needing to install a separate application. A 30-day trial

of the full Adobe Reader version is available at no cost with our registration. You can also use the desktop version of the program from within Windows. Users of Windows Vista can also download the standalone version of Adobe Reader. See also: Built-in Web Server Many Windows users prefer to have a web server installed on their systems in order to share files and folders between their desktop and their computers. This utility is always included in Windows XP and later. Windows Server 2008

includes a built-in web server along with other services. While it is more powerful than other web servers available for Windows, it does have some drawbacks. You can download a free version of this server from its official website. There are several alternatives. IIS Web Server is one option, which is compatible with Windows 2000 to Windows Server 2003. Another option is StarWinds IIS Server, which is a free version of the StarWinds IIS Server. WebDev.WebServer.exe allows you to install and

run a web server on Windows XP, Vista, and Windows 7. It works on a low port number (allowing you to run multiple servers on the same computer) and includes options for Apache compatibility. This is an excellent choice for small business users who need a free server that is compatible with Apache. ## System Requirements:

Minimum: OS: Windows  
10 Processor: Intel Core  
i3 / AMD Athlon 64 Dual  
Core Memory: 2GB RAM  
Graphics: NVIDIA  
GeForce GT 640 / ATI  
Radeon HD 5870 DirectX:  
Version 11 Hard Drive: 50  
GB available space Sound  
Card: DirectX Compatible  
(Most 32-bit soundcards  
support the DirectX  
Compatible interface)  
Additional Notes:  
Preferably a 64-bit OS  
(Windows 7/8)  
Recommended: OS:  
Windows
